

## Lambert's DBE Program Office Upcoming Informational Seminars in 2009

Lambert St. Louis International Airport's Disadvantaged Business Enterprise (DBE) Program Office and the U. S. Small Business Administration (SBA) and the Leadership in Energy & Environmental Design (LEED) will hold a series of meetings at Harris-Stowe State University - Telecommunity Room. Please note the times and dates:

### Tuesday, April 14 - 9:00 am to 11:00 am at Harris Stowe in the Telecommunity Room

- **Informational Workshop on Leadership in Energy and Environmental Design (LEED) "Green Building Concept"** - This informational workshop will provide an overview of green building practices, with emphasis on site planning and development, water efficiency, conservation of materials and indoor environmental quality. The U. S. Green Building Council is transforming the building environment through LEED, a benchmarking system that measures the environmental impact of buildings. The mission of the council is to develop, initiate and accelerate the implementation of green building concepts, technologies and principles that promote environmentally responsible and healthy places to live and work.

### Thursday, May 28 - 6:00 pm to 7:30 pm at Harris Stowe in the Telecommunity Room

- **Business Opportunities** – Doing business with the federal government, state and local governments, and large corporations. How registration in the Department of Defense's Central Contractor Registration ([www.ccr.gov](http://www.ccr.gov)) can make federal contracting officers, and others, aware of your business and its capabilities. How the SBA's Dynamic Small Business Search (DSBS) tool is used by federal contracting officers, state and local governments and large corporations to find small businesses to partner with. Information will also be provided on how to get business in the private sector.

### Tuesday, September 8 - 9:00 am to 11:00 am at Harris Stowe in the Telecommunity Room

- **Informational Workshop on Leadership in Energy and Environmental Design (LEED) "Green Building Concept"** - This informational workshop will provide an overview of green building practices, with emphasis on site planning and development, water efficiency, conservation of materials and indoor environmental quality. The U. S. Green Building Council is transforming the building environment through LEED, a benchmarking system that measures the environmental impact of buildings. The mission of the council is to develop, initiate and accelerate the implementation of green building concepts, technologies and principles that promote environmentally responsible and healthy places to live and work.
